

Rangeland Management: Blms Hot Desert Grazing Program Merits Reconsideration: Rced-92-12

By -

Bibliogov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 76 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. Pursuant to a congressional request, GAO examined the Bureau of Land Managements (BLM) management of the federal livestock grazing program in the Southwest desert areas, known as hot deserts, focusing on the programs environmental and budgetary costs and benefits. GAO found that: (1) current livestock grazing activity on BLM allotments in hot desert areas imposes the risk of long-term environmental damage to the hot deserts and does not generate sufficient revenues to provide for adequate management; (2) there was evidence of grazing damage occurring on BLM lands, as well as evidence of livestock grazings adverse impact on several endangered wildlife species; (3) some damaged lands may take decades to recover if they recover at all; (4) the current level of BLM spending is insufficient to perform all necessary range management tasks; (5) although the 1, 000 operators who hold livestock grazing permits generate little net income from ranching public lands, they highly value the ability to maintain a traditional ranching lifestyle; (6) BLM lacks the staff resources and data to know if damage is occurring on many hot desert allotments and...
