While the M24 Chaffee was a successful design, its main gun was not effective enough against well armored opposition. Although the primary mission of a light tank was scouting, the U. S. Army wanted one with more powerful armament. The development of the new tank, T37, began in 1947. The vehicle was designed to be air-transportable, and the desired anti-tank capabilities were provided by installing a long 76-mm gun with an advanced rangefinder. In 1949, with the adoption of a less ambitious rangefinder, the projects designation was changed to T41. Production started in 1951 at Cadillacs Cleveland Tank Plant, and by 1953 the tank replaced the M24 in the United States Army. Initially the M41 was nicknamed Little Bulldog, then renamed Walker Bulldog after General Walton Walker, who was killed in a jeep accident in Korea in 1950. The Walker Bulldog saw limited combat with the U. S. Army during the Korean War, but for the most part, the conflict served as a testing ground to work out the...
