

Biology: How Life Works, Volume 2

By Professor James R Morris, Harvard University Daniel L Hartl, Professor Andrew H Knoll

W. H. Freeman, United States, 2015. Paperback. Book Condition: New. 274 x 226 mm. Language: English . Brand New Book. Rethinking biology means rethinking the text, the visual program, and assessment. Ordinarily, textbooks are developed by first writing chapters, then making decisions about art and images, and finally, once the book is complete, assembling a test bank and ancillary media. This process dramatically limits the integration across resources, and reduces art, media, and assessments to ancillary material, rather than essential resources for student learning. Biology: How Life Works is the first project to develop three pillars the text, the visual program, and the assessment at the same time. All three pillars were developed in parallel to make sure that each idea is addressed in the most appropriate medium, and to ensure authentic integration. These three pillars are all tied to the same set of core concepts, share a common language, and use the same visual palette. In this way, the text, visual program, and assessments are integral parts of student learning, rather than just accessories to the text. RETHINKING THE TEXT Integrated Biology: How Life Works moves away from a focus on disparate topics, towards an integrated approach. Chemistry is...
