Hill & Wang Inc.,U.S. Paperback. Book Condition: new. BRAND NEW, Irreligion: A Mathematician Explains Why the Arguments for God Just Don't Add Up, John Allen Paulos, Are there any logical reasons to believe in God? The mathematician and bestselling author John Allen Paulos thinks not. In "Irreligion" he presents the case for his own world view, organizing his book into twelve chapters that refute the twelve arguments most often put forward for believing in God's existence. Interspersed among these counterarguments are remarks on a variety of irreligious themes, ranging from the nature of miracles and creationist probability to cognitive illusions and prudential wagers. Special attention is paid to topics, arguments, and questions that spring from his incredulity 'not only about religion but also about others' credulity'. Despite the strong influence of his day job, Paulos says, there isn't a single mathematical formula in the book.
