

Developing Markets for Agrobiodiversity: Securing Livelihoods in Dryland Areas (Hardback)

Filesize: 9.6 MB

Reviews

A must buy book if you need to adding benefit. Better then never, though i am quite late in start reading this one. I am very happy to inform you that this is basically the very best book we have study during my own life and could be he finest ebook for possibly.

(Rodger Hane)

DEVELOPING MARKETS FOR AGROBIODIVERSITY: SECURING LIVELIHOODS IN DRYLAND AREAS (HARDBACK)

Taylor Francis Ltd, United Kingdom, 2007. Hardback. Book Condition: New. 234 x 156 mm. Language: English . Brand New Book. This wonderful book demonstrates how rural livelihoods - as well as diets, health and ways of life - are enhanced by the so-called neglected and underutilized plant species which, in the book's Syrian case study, include such deliciously interesting things as capers, laurel, jujube and figs. Using value chain analysis the author illuminates the opportunities for strengthening arid land economies with attention to such species, while simultaneously maintaining the diversity and integrity of those plant genomes, landscapes and cultures. And keeping the world worth tasting. KEN WILSON, EXECUTIVE DIRECTOR OF THE CHRISTENSEN FUND Alexandra Giuliani delivers a convincing and very practical account of how biodiversity products derived from neglected and underutilized plant species enter the markets in Syria. By highlighting the value of these plant products for the family income and health status of marginal farmer families in rural drylands and semi-arid areas, she brings the message home as to why it is so important to maintain biodiversity of the genetic resources not by protection alone, but rather through their judicious use. KATHARINA JENNY, SENIOR ADVISOR, FEDERAL DEPARTMENT OF FOREIGN AFFAIRS, SWISS AGENCY FOR DEVELOPMENT AND COOPERATION Just four crops - maize, potatoes, rice and wheat - provide more than 90 per cent of the world's food. Old varieties of even these crops are disappearing as farmers and consumers strive for more uniformity in food products. This in turn affects less obvious elements, such as insects that play a role in pollinating plants or controlling pests and the soil organisms that help plants extract nutrients from the soil. Also, farmers need a broad base of agrobiodiversity to be able to respond and adapt to environmental changes and to...
