The Climatology of South Carolina (Classic Reprint)

By J W Bauer

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The Climatology of South Carolina Few, if any, States afford so interesting a field of study in physiography as South Carolina. Her topography varies from marshy coastal lowlands, interior alluvial plains and swamps, sandy highlands, rolling uplands to low mountains, in a series of gradations from the Atlantic Ocean to the southern spurs of the Appalachians. Her shape is that of an an isosceles triangle having its base resting on the ocean and its apex touching the mountains. This triangle is inclosed by the lines formed by the parallels of latitude, 32 degrees and 35 degrees 12 minutes north, and longitude 78 degrees 30 minutes, and 83 degrees 20 minutes west of Greenwich. The State is bounded on the north by North Carolina, on the east by North Carolina and the Atlantic Ocean, on the south by the Atlantic Ocean and Georgia, and on the west by Georgia. Her greatest dimension is a line from Georgetown running northwestward through Columbia to the northwestern part of Greenville County, and measures 241 miles. The longest straight line...
